PROFILE

Detail-oriented B.Com (Computer Applications) graduate with hands-on-experience in Python, SQL, Excel, Power BI, and Machine Learning. Skilled in data cleaning, data analysis, visualization, dashboard development, and exploratory data analysis. Seeking an entry-level Data Analyst role where I can apply my analytical and technical skills to transform data into meaningful insights and support data-driven business decisions.

SKILLS

Python | Pandas | Matplotlib | Seaborn | Numpy | Power BI | SQL | Data Cleaning | Data Preprocessing | Exploratory Data Analysis | Data-Driven Decision Making | Machine Learning Models | Statistical Analysis |

PROJECTS

Uber Ride Analysis

Key Skills: Python, Pandas, Numpy, Matplotlib, Seaborn

- Analyzed **1,155 Uber ride records across 7 attributes** to identify patterns in ride categories, locations, mileage, and trip purposes.
- Performed **data cleaning, data manipulation, and exploratory data analysis (EDA)** using Python and Pandas.
- Analyzed ride categories and found that **93.3% of rides were for business purposes and 6.7% were for personal purposes**.
- Explored trip purposes including **meetings, meals/entertainment, errands, customer visits, airport/travel, and commuting** to identify usage patterns.

Travel Insurance Prediction Analysis

Key Skills: Python, Pandas, Numpy, Data Preprocessing, (EDA), Data Visualization

- Analyzed **1,987 customer records** to identify factors influencing travel insurance purchase decisions.
- Performed data cleaning, preprocessing, and exploratory data analysis using **Pandas and Numpy**.
- Built a **Random Forest Classification model** to predict travel insurance purchases with **81.16% accuracy**.
- Used data visualization techniques to identify patterns related to customer demographics, income, employment, and travel behavior.

Credit Card Fraud Detection

Key Skills: Python, Pandas, Numpy, Scikit-learn

- Analyzed **284,807 credit card transactions across 31 features**, including **492 fraudulent and 284,315 legitimate transactions**.
- Performed data preprocessing and exploratory data analysis using **Python, Pandas, and Numpy** to identify transaction patterns and class imbalance.
- Developed **Random Forest classification model** achieving approximately **99.94% accuracy**.
- Evaluated the model using **precision, recall, and f1-score**, achieving approximately **90.71% precision, 14.37% recall, and 77.15% F1-score**.

EDUCATION

Bachelor of Commerce with (Computer Applications)
MKU University

Jul 2023 – May 2026 | Theni

N.S.Girls.Higher.Sec.School
HSC

Sep 2021 – May 2023 | Theni

CERTIFICATES

- Data Science Course Certification: Guvi
- Introduction to Data Analysis using Microsoft Excel: Coursera

INTERNSHIP

Internship Trainee
Mani Star Aqua

09 May 2025 – 24 May 2025 | Theni

- Collected, cleaned, and organized business records using **Microsoft Excel**.
- Performed **data entry, data validation, and record analysis** to identify inconsistencies.
- Used **Excel functions, filtering, sorting, and pivot tables** to summarize business data.
- Prepared reports and maintained accurate records to support **data-driven decision-making**.
